2. DEMONSTRATION OF RELATIONSHIPS WITH OTHER RESEARCHERS, FUNDERS AND END-USERS.

I have well-developed links with:

- the New Zealand research community, universities and CRI's;
- Government ministries concerned with social policy issues such as Ministry of Social Development, Ministry of Justice; and Department of Internal Affairs.
- Community-based groups and organisations through their collaboration in Family Centre research and community development.

These links are demonstrated by my:

- Membership of an expert group providing input into the development and refinement of the living standards survey questionnaire for the Ministry of Social Development during October 2003.
- Membership of the 2004 CPI (Consumer Price Index) Review Advisory Committee.
- Management and Objective Leadership roles in three major PGSF FRST funded research projects.
- Successful relationship management within the FCSPRU and in research partnerships that have been formed with Wellington Medical School, University of Waikato, Victoria University of Wellington, including the Health Services Research Centre, and Massey University.

3. RESEARCH EXPERIENCE AND INTERESTS

My PhD research involved a detailed study of land distribution, genealogy and social networks in an atoll village in the Republic of Kiribati (1993 to 1996).

Following PhD completion, my research experience and interests developed in the context of the work of the Family Centre Social Policy Research Unit. This has involved all aspects of the Unit's research, including:

- Social indicator development (NZ Individual Deprivation Index, NZiDep)
- Local government social monitoring systems
- project conceptualisation and design
- questionnaire design and development
- funding proposal development, including managing and coordinating the development of collaborative proposal by team members located in multiple sites
- developing and maintaining successful collaborative relationships with researchers in other institutions
- managing research fieldwork
- analysis of qualitative data, quantitative data, and social network data (familiar with SPSS, STATA, and Ucinet applications for statistical, and

network data analysis, respectively, in addition to common word-processing, spreadsheet and relational database applications.)

- Analysis of income data including the application of equivalence scales and fuzzy set methods to the complementary analysis of monetary and non-monetary living standards data.
- development of research reports and associated papers
- presentation of research findings in workshops, seminars and conferences

I was centrally involved in the development of five successful FRST funding proposals and four successful HRC funding proposals. These include the Investigating Poverty project, the EWAS (Enhancing Wellbeing in an Ageing Society) project, and the New Zealand Longitudinal Study of Ageing (NZLSA).
